The VAN HOOL Company:

more than 2.500 employees, an industrial complex with a yearly production capacity of 3.000 units, a R & D Department of over 120 engineers. More than 30 years background in bus, coach and industrial vehicle building for all continents has brought in an enormous amount of technological and operational experience.

With our own most characteristic techniques we construct large series of city-buses, articulated buses, double-deckers, minibuses and all kinds of coaches and also special vehicles such as coaches for handicapped, V.I.P. lounge coaches, airfield buses, medical coaches, library coaches, etc.

Our know-how and our industrial potential allow us to reply to any demand from the most simple to the most sophisticated.
